

Dr. Vivek Menon is the Mission Assurance Director at the National Reconnaissance Office (NRO), leading enterprise strategy across Microelectronics, Space Industrial Base, and Supply Chain Risk Management. As NRO's Microelectronics Lead and Chair of the Space Industrial Base Working Group, he drives the agency's semiconductor roadmap, advocates for DPA Title III funding to protect critical supply chains, and represents NRO at the White House OSTP — shaping national microelectronics policy at the highest levels of government. Prior to the NRO, he spent over a decade leading multidisciplinary teams in microelectronics security and AI/ML hardware development across industry and academia. He holds a Ph.D. in Computer Engineering from Virginia Tech, 6 U.S. patents, and has co-authored 40+ technical publications. His exceptional service has been recognized with the NRO Director's Circle Award and the National Intelligence Exceptional Achievement Medal.
