

Gregg Jessen (SM'12) received the B.S. degree in engineering physics from Wright State University, Dayton, OH, USA, in 1997, and the M.S. and Ph.D. degrees in electrical engineering from The Ohio State University, Columbus, OH, USA, in 1998 and 2002, respectively. He is currently a Distinguished Fellow leading advanced corporate technology development at MACOM. From 2019 - 2021, he led custom compound semiconductor MMIC solution development as the Director of the Microelectronics Center Foundry and a Chief Scientist at BAE Systems, Inc. Prior to this, Dr. Jessen was a Fellow of the Air Force Research Laboratory in the Sensors Directorate. In these roles, he developed numerous material and transistor technologies in wide bandgap and ultra-widebandgap materials for RF subsystems, component applications, and harsh environment operation.
